Nørdus

the scandinavian collection

With 'Nørdus', Decospan offers an accessible collection of veneered panels that plays into the trend towards a more **Scandinavian and modernist interior design**. We consider ourselves as a part of a worldwide community that aims to share the beauty of nature and enjoy it in an environmentally-friendly and responsible manner.

The contemporary living environment reflects our personalities and expectations in life. We aim for **modern and timeless products** of excellent quality with architectural shapes. Thanks to 'Nørdus', you can experience this simple and yet practical interior trend with timeless elegance yourself.

For the 'Nørdus' collection, only the best **softwood and birch wood** is collected and carefully processed into finely cut veneer. This way, the raw materials are optimised. Advanced surface treatments reinforce the unique beauty of wood and highlight its 3D aspect. A team of trendwatchers suggested various trendy finishing options such as metallic shades, ash grey or neutral white accents allowing 'Nørdus' to be integrated in every interior.

This collection embodies the Scandinavian lifestyle and nourishes us with cosiness and warmth. Get inspired!

The 'Nørdus' collection contains **8 designs** which go perfectly with a contemporary interior and which encourage creativity. For that reason, a number of possible finishes with paint or oil is suggested for every wood type. The veneer's thickness can be chosen between **0.6 mm or 1.5 mm** depending on the wood type. A top layer of 1,5 mm is always heavy brushed. Thanks to the unique **mixmatch technique**, the veneer panels get a solid character, without optical interruption. "Nørdus" is available as veneered panel, flex and matching edge bands. All possibilities can be found in the table on page 41. For more information about the illustrated finishes, please contact Hesse-Lignal (paints) and Rubio Monocoat (oils). Their contact details can be found on page 40.

PANEL

A Nørdus panel is composed of a top layer of real wood veneer, a core of 18 mm MDF and a backing of real wood veneer for stability reasons. The top layer is always a jointed veneer sheet in accordance with the chosen design, composed using our mixmatch technique. In this process, strips of veneer wood from various trees with varying slicing methods are randomly jointed into a full sheet. This way, the panel looks like solid wood. By creating a continuous surface with various panels, there is no optical interruption. Wild Pine#06 is the only exception to this and is made with one sheet of rotary cut veneer per panel without any joints.

DOUBLE-SIDED

Double sided panels are finished on both sides with the same Nørdus veneer.

SINGLE-SIDED

These panels only have the Nørdus design on the front. A veneered board must always have a backing to guarantee a good stability. More info about the backing layer can be found in the table below. The single-sided panels are ideal for applications where only one side of the panel is visible.

The Nørdus products are always delivered unfinished and should yet be treated by the processor. For more information about the finish of Nørdus, please contact Hesse-Lignal (stains and paints) and Rubio Monocoat (oils).

Ecologically

All raw materials that we purchase for Nørdus are thoroughly inspected by Decospan in advance. This way, we are sure that all the wood used originates from responsible forestry only.

On request and depending on availability, FSC®-certified products are possible. Also zero-added formaldehyde panels are possible on explicit request.

Dimension Panel	DOUBLE-SIDED	SINGLE-SIDED	
	Front- and backside	Frontside	Backside
2790 x 1240 mm	SPRING LARCH#06	Larch / 0,6 mm / mixmatch / light brushed	Larch B / 0,6 mm / pre-sanded
	SPRING LARCH#15	Larch / 1,5 mm / mixmatch / heavy brushed	Pine B / 1,5 mm / heavy brushed
	AUTUMN LARCH#06	Larch lightly smoked / 0,6 mm / mixmatch / light brushed	Larch B / 0,6 mm / pre-sanded
	AUTUMN LARCH#15	Larch lightly smoked / 1,5 mm / mixmatch / heavy brushed	Pine B / 1,5 mm / heavy brushed
	WINTER LARCH#06	Larch heavily smoked / 0,6 mm / mixmatch / light brushed	Larch B / 0,6 mm / pre-sanded
	WINTER LARCH#15	Larch heavily smoked / 1,5 mm / mixmatch / heavy brushed	Pine B / 1,5 mm / heavy brushed
	CLEAN SPRUCE#06	Spruce / 0,6 mm / mixmatch / light brushed	Spruce B / 0,6 mm / pre-sanded
	CLEAN SPRUCE#15	Spruce / 1,5 mm / mixmatch / heavy brushed	Pine B / 1,5 mm / heavy brushed
	VIVID SPRUCE#06	Knotty spruce / 0,6 mm / mixmatch / pre-sanded	Spruce B / 0,6 mm / pre-sanded
	HONEY PINE#06	Carolina Pine / 0,6 mm / mixmatch / pre-sanded	Carolina Pine B / 0,6 mm / pre-sanded
2500 x 1240 mm	SNOW BIRCH#06	Birch half rotary cut / 0,6 mm / mixmatch / pre-sanded	Birch B / 0,6 mm / pre-sanded
	WILD PINE#06	Pine rotary cut / 0,6 mm / pre-sanded	-

For projects, other dimensions and substrates are possible on request. However, for such orders a longer delivery period must be taken into account.

"Nørdus" stands for **unique and superior top quality**. That is why you should only trust the panels which carry the **Decospan marking at the side**. The stamp also refers to the production date enabling a clear tracing of every panel.

For a smooth handling, Nørdus panels are always packed with a fitting cardboard protection sheet and supported by wooden blocks. For container transport, Nørdus can also be delivered on pallets!

FLEX

Flex is a jointed veneer sheet that is very easy to process. The veneer sheet is pressed on a paper substrate first after which the wood fibres are broken. This gives us a flexible sheet of veneer that can be processed both as a flat and curved surface. Flexibility is the main feature of this product: it is perfectly suitable for covering curved surfaces, cutting into edge bands, covering door bodies, etc.

A Nørdus flex **top layer** always consists of a 0.6 mm jointed sheet, the **backing** consists of a paper substrate in a colour tint close to the colour of the chosen reference. The top layer and backing are glued with a formaldehyde-free glue.

2750 x 1220 mm	SPRING LARCH#06	Larch / 0,6 mm / mixmatch / light brushed
	AUTUMN LARCH#06	Larch lightly smoked / 0,6 mm / mixmatch / light brushed
	WINTER LARCH#06	Larch heavily smoked / 0,6 mm / mixmatch / light brushed
	CLEAN SPRUCE#06	Spruce / 0,6 mm / mixmatch / light brushed
3050 x 1240 mm	VIVID SPRUCE#06	Knotty spruce / 0,6 mm / mixmatch / pre-sanded
	HONEY PINE#06	Carolina Pine / 0,6 mm / mixmatch / pre-sanded
	SNOW BIRCH#06	Birch half rotary cut / 0,6 mm / mixmatch / pre-sanded
2500 x 1240 mm	WILD PINE#06	Pine rotary cut / 0,6 mm / pre-sanded

"Nørdus" flex is always packed in this packaging. That is why you should only trust the sheets which carry the Decospan marking at the side of the box. This is the only guarantee for **Decospan quality!**

For gluing the product, we strongly recommend to follow our instructions very closely. These can be found in every box or on our website: www.nordusdecospan.com

EDGE-BANDING

For each design, matching edge bands have been developed. This way, the edges of the Nørdus panels can be perfectly finished. In doing so, Nørdus offers a total solution allowing each project to lead to a successful end result.

All edge bands are constructed of veneer wood with a strengthened membrane, not pre-glued and packed in rolls of 50 running meters per roll. All edge bands are available in both 26 mm and 46 mm high. The Nørdus edge bands are not FSC® certified.

Apart from the edge bands in the matching wood types, we also offer the possibility to choose an edge band with the appearance of a transversally sawed birch multiplex. The fine layers that are typical for the construction of a multiplex panel match the Scandinavian interior style and give the project a pure, authentic look. Nevertheless, the stability and processability of an MDF-panel is preserved.

FINISHES

The simplicity of Scandinavian design and the natural beauty of typical wood types from growth areas in Northern Europe have inspired us to develop the Nørdus collection. With this collection, we also want to inspire others and encourage them to start a creative process with these natural products. For that purpose, we already illustrate a number of possible finishes throughout the brochure. In order to do so, we relied on the expertise and creativity of **two partners who are specialists in colouring and protecting wooden surfaces.**

Hesse Lignal has been specialising in the production of **high-quality paints and stains** for over 100 years. In doing so, they concentrate on environmentally-friendly water paints, modern UV-systems and products made of sustainable raw materials. Their years of experience in finishing wooden surfaces using high-quality paints offers unlimited possibilities to fully customize Nørdus.

The Belgian company **Rubio Monocoat** simplifies the finish of a wooden surface to applying only one single layer. Rubio Monocoat **oil features some unique characteristics.** It anchors within a blink of an eye with the upper fibres of the wood via molecular binding. This ensures that these oils are ecological, high-quality and easy in use.

Thanks to the collaboration between innovating companies that are creative with wood and finish, we put our mission into practice: develop and manufacture products based on veneer woods and make them available for both purchaser and processor.

Comments:

- Autumn & Winter Larch may occasional contain bright spots in the veneer.
- Wild Pine may have some cracks in the veneer surface due to the tension in the wood.
- Vivid Spruce may have occasionally cracks or open knots. These are never filled with wood filler.
