

QUERKUS
finest oak collection

“We see it as our mission to produce the most beautiful and decorative oak veneered panels, enabling you to transform your most creative ideas into sensational interiors.”

Every Decospan panel we produce is unique. We handle the available oak veneer creatively and with the utmost respect. Our unique production processes capture and enhance the beauty, colour, markings and structure of solid wood, and combine these with the many advantages of a veneered panel. The gleam of amazement in the eyes of our customers when they enter their living room, kitchen or office, gives us the ultimate sense of satisfaction.

Intelligent. With Querkus, we have succeeded in capturing the capriciousness of nature in an accessible and easy to process product. No need to worry about product specifications; you can just focus entirely on the look and feel that will make your project unique.

Authentic. Querkus stands for an honest and authentic product. That's why, as well as processing new oak, we also give old oak beams a second lease of life. Veneer from old oak has a more seasoned and robust look. Recycling and upcycling at their best.

Sustainable. With Querkus we are working to reduce our environmental impact. We do this by making a product with a long service life, only working with oak from sustainably managed forests and by using environmentally-friendly production processes. This is all safeguarded in our Pure Wood Charter.

European. Oak is highly regarded in the furniture industry and in interior design. Because of its durability and excellent workability, oak has been used for many centuries in these parts. Our buyers are always searching for the best logs of European origin.

Oak Smoked Robusta

Querkus is a collection of decorative oak veneered panels. You choose the look, veneer thickness and surface finish to create the perfect board that suits your style completely. From now on you no longer have to worry about technical specifications because our simple step-by-step plan enables you to compose a product that will make your project shine.

Step 1: Choose the LOOK

First you determine the appearance of your Querkus veneer product. Think carefully about the atmosphere you want to achieve as the end result. Depending on the chosen look, different veneer thicknesses are available, which you choose depending on the budget or the desired finishing.

For an extra solid look, veneer strips from different trees are combined using our unique mixmatch jointing method. This gives the boards a planked look but still fits together.

Step 2: Choose the THICKNESS

Each look may or may not be available in a number of thicknesses. Choose your thickness according to your budget or desired 'touch' (see step 3).

Step 3: Choose the TOUCH

Natural oak veneer distinguishes itself from other types of wood and plastic alternatives by its special wood design and grain structure. This can be further accentuated by applying surface treatments. The experience and feel are thus emphasized even more. You immediately feel the authenticity of the product.

Plain

These panels are pre-sanded as standard with 120 grit. The surface is smooth (Plain) and can be further sanded and finished by you.

 Plain

Brushed

A brushed surface does justice to the natural wood structure. **Brushed type B1:** the soft summer wood is given a subtle and light brush treatment. **Brushed type B2 and type B3:** the structure can be seen more in depth, with the effect being comparable to sand-blasting.

 Brushed type B1

 Brushed type B2

Scratched

We use a patented procedure for an authentic-looking band sawn structure, giving the veneer panel the look of a solid wood plank, worked by craftsmen.

 Scratched type S1

 Scratched type S2

 Scratched type S3

 Scratched

Distressed

Random hammer impacts create an unpredictable pattern, giving the veneer an seasoned look.

 Brushed type B3

 Distressed type D1

Combination options
LOOK, THICKNESS and TOUCH

See overview table page 44-45

Embossed

A pronounced relief structure is applied to the panels under high pressure. This gives the surface a weathered look & feel.

👁️ Oak Natural Allegro

Natural

NO NONSENSE PURITY

Natural brings the honest and endearing beauty of the oak to the fore. No frills, just pure nature.

For this we use only strictly selected oaks, grown slowly in controlled and regulated growing areas.

The Natural panels are untreated enabling you to apply a wood stain or varnish finish according to taste. Wood oil also offers optimum protection, while retaining the veneer's natural feel and warmth.

The 3 Oak Natural looks are available in 4 veneer thicknesses: 0.6 mm, 1 mm, 1.5 mm and 2 mm.

VINTAGE

RESPECTED, REPURPOSED & UPCYCLED

The Vintage series tells a story of quality, respect and craftsmanship that give each interior a unique and lived-in look.

For **VINTAGE original**, oak beams that have served for decades as construction wood and train components are processed into veneer with a rich past and warm appearance. The 3 references of Vintage Original are available in 1 and 1.5 mm.

VINTAGE retro pays tribute to the quality and homely cosiness of yesteryear. With its softer expression, Vintage retro is the perfect alternative for those looking for a less pronounced yet authentic character. The Vintage retro references are only available in 0.6 mm which makes this line also very accessible from a budgetary point of view.

The **VINTAGE intense**-line is the showpiece of the Vintage series because of its strongly weathered feel. The surface consists of deeply worn unevenness as if the wood has been through many years in the wilderness. Vintage Intense is only available with a top layer of 3.5 mm and is always provided with an extra deep structure.

Due to the different veneer origins and processing techniques, the different Vintage lines may not be used interchangeably in the same project.

Smoked

A CLASS OF ITS OWN

Oak Smoked exudes pure class. Smoking the Croatian oak to the core gives it a classy look and unique character. The traditional smoking process and the oak's typical properties result in a strong, dark look. Oak Smoked is reminiscent of exclusive clubs and hotel lobbies with the very best whiskies and cigars.

The 3 Oak Smoked looks are available in 2 veneer thicknesses: 0.6 mm and 1.5 mm.

Please note: The colour of the wood will change slightly on sanding.

view the possibilities in the table on page 44-45

PEFC™ or FSC® available on request.

PANEL

Standard: MDF 18mm - dimensions 3050x1220mm and 2500x1240mm

Other cores and dimensions available on request.

Please note: surface area treatments (touch) on veneered panels with a coloured core (green/red/black) may sometimes suffer from slight colour seepage and we therefore strongly advise against using these.

BALANCING LAYER (Rear)

A veneered panel always needs a backing to guarantee the maximum stability of the panel. The table below shows the possibilities.

Possibilities:

		DOUBLE-SIDED		SINGLE-SIDED			
		A/A quality		A/B+ quality		A/B quality	
		front and rear		front	rear	front	rear
Oak Natural	0,6 mm	Natural	Natural	Natural	Natural Oak B+	Natural	Natural Oak B

Oak Smoked	0,6 mm	Smoked	Smoked	Smoked	Natural Oak B+	Smoked	Natural Oak B
	1,5 mm						

A detailed description of the qualities can be found on www.querkusdecospan.com

"Querkus" is synonymous with a unique and superior quality product. You should therefore only place your trust in panels on which you can see the Decospan logos on the side. The stamp also gives a production date so that each panel can be clearly traced.

In this way, Decospan seeks to distinguish itself and guarantee its quality!

B. FLEX

Flex is a veneer lamination that is very easy to work with. The veneer lamination is first pressed onto paper and the wood fibres are then broken. This gives us a flexible sheet of wood veneer.

FLEXIBILITY is the key feature of this product.

Applications : curved surfaces, edge bandings, doors, to press panels,...

Dimensions:
3050x1220 mm / 2750x1220mm

TOP LAYER (Front)

The Querqus veneer with the selected

👁️ LOOK: only Natural, Vintage Retro and Smoked

📏 THICKNESS: 0,6 mm

👋 TOUCH: Plain, Brushed type B1 or Scratched type S1

The gluing of the top- and backing layer is done with a formaldehyde-free glue.

Querqus Flex is never delivered filled.

Flex is possible on a limited number of references

See overview table pages 44-45

BACKING LAYER

Paper underlay in the shade of the selected LOOK.

Querqus flex is packed in this packaging.
Only this packaging guarantees Decospan quality!

For gluing the product, we strongly recommend that you follow our instructions. These can be found in each box or on our website: www.querkusdecospan.com.

C. SHEET

Thin sheets for applications where lamination on alternative substrates is needed. The veneer properties and thickness of Oak Vintage Original and Oak vintage Intense do not allow to flex the joined sheet. However, these sheets remain very handy as a solution to cover challenging finishes and constructions.

Applications: edge banding, door cladding, pressing panels,...

Dimension: 3050x1220mm

TOP LAYER (Front)

The Querqus veneer with the selected

👁️ LOOK: only Vintage Original or Vintage Intense

📏 THICKNESS: depending on the chosen look 1 mm or 3,5 mm

👋 TOUCH: depending on the chosen look: Plain or Embossed type E1

Sheet is possible on a limited number of references

See overview table pages 44-45

BALANCING LAYER

The sheets are provided with a firm fleece, which makes the sheets easy to manipulate and also the gluing can be done without any problem.
