MDF board is medium density fibreboard, produced under high pressure and high temperature. AS MASS offers MDF board from the best MDF manufacturers to ensure the highest quality.

Fibrabel: standard density or 450-600kg / m³.
Formaldehyde class E1: low

Fibralux: high density or 600-800kg / m³.
Formaldehyde class E1: low.

Fibomax: high density or 600-800kg / m³.
Formaldehyde class E1: standard.

AS MASS sells the highest fire class B used in construction

Fire retardent classification

The IMO (International Maritime Organization) certificate with the mark "Wheelmark" (steering wheel) means that the product has been tested in an IMO-certified laboratory and meets the established conditions.

The product range includes formaldehyde-free MDF boards. They are suitable for allergy sufferers and hospitals.

High-density MDF board (specific weight 700-820 kg / m³) is suitable for milling. We also offer black, gray and pre-primed MDF board.

The stock is available in standard dimensions: 3050 x 1220mm and 2440 x 1220mm.

Spanolux offers products with FSC certification.
