

Spliced veneer sheets

We provide the service for making the spliced veneer sheets. We prepare the spliced veneer sheets according to the sizes provided by the customer and required assembly method of all species of veneer available in stock.

The most popular assembly methods:

Bookmatch

Slipmatch

Mixmatch

Spliced veneer quality requirements:

A quality: bookmatch or slipmatch. Texture as requested – flatcut or quartercut. Lamellas have the same width and come from the same bundle to the extent of the spliced veneer sheet. Minimum special characteristics in veneers are permitted.

AB quality: bookmatch or slipmatch. Texture not specified – flatcut or quartercut. Lamellas may have different widths to the extent of the spliced veneer sheet, but bundle come from the same package. Most special characteristics in veneers are permitted.

B quality: randommatch. Texture not specified – flatcut or quartercut. Lamellas may have different widths to the extent of the spliced veneer sheet, and bundle may come from different packages. All special characteristics in veneers are permitted. Special characteristics in veneers may include open and closed knots, colour changes, individual spots and sapwood.

We also offer the veneer-edge cutting service with guillotine.
