

Sawn lumber

Precious wood, i.e. solid wood lumber is a high-quality dried sawn lumber which as a rule has a humidity of 8+/-2%. Solid wood lumber is used for making doors, windows, stairs as well as furniture, floors and wine casks. The choice includes the common types of wood of different thickness and lengths such as oak, ash, beech, walnut etc as well as exclusive types of wood such as zebrano, teak, ...
